

Testimonials

Lech, Ski Arlberg / Austria
Thomas Maghörndl, operation manager

For many years we have used MountainOffice to support our daily work. All maintenance- and service tasks are scheduled, documented and tracked by MountainOffice including snowmaking and fleet management. Managing schedules and appointments can be done very easily with all schedules and documents stored in one database. Working with MountainOffice provides us with strong organized management of our resort. We recommend MountainOffice to other resorts.

Saalbach-Hinterglemm / Austria
Mitterer Rudolf, operation manager

We have used MountainOffice for several years for the administration of our ski resort. We do documentation of lift and groomer maintenance, NDT and other working fields with this tool. Because of our use of MountainOffice we get great compliments for fulfilling legal regulations and standards by manufacturers and regulators.

Kronplatz ski resort / Italy
Georg Untersteiner, VP operation

MountainOffice is a modern tool for ski resorts which provides organisation to capture and to document maintenance and other activities, from lubrication on a sheave assembly to the documentation of external oil-tests for gears, report of safety checks or grip force tests. Everything can be managed and captured very easily with MountainOffice even for lift operators or maintenance staff with a minimum of paper work.

Davos Klosters Mountains /Switzerland
Peter Lietha, technical director and security manager

We have successfully used MountainOffice in our company over the last few years. With this tool we manage all service - test workings of the skilifts, snow guns, grooming machines as well as the infrastructure. All necessary service work is documented and captured. Additionally we manage our staff skills and qualifications with MountainOffice.

We reviewed different facility management and maintenance software and chose MountainOffice because:

- Simple handling
 - Clear overview
 - The database is in our network
 - If there are any problems there is fast and competent support
 - Software-updates according to customers needs
 - Price
-

Großarl ski resort – SkiAmade / Austria
Engelbert Gschwandtl, operation manager

We use MountainOffice for several years for management of our technical infrastructure like ski lifts, artificial snowmaking system and grooming machines. We appreciate specially the simple handling and clear structure of the software, which helps us significantly to meet the needs of today's ski resorts operation and management.

Doppelmayr
Hermann Schwarzenbacher / Doppelmayr Russia

MountainOffice was developed in close cooperation with Doppelmayr. The software for skilift operators is great because of its functionality and simplicity. The focus was based on ease of use. No matter if it is administration and documentation of ongoing service and maintenance for skilifts MountainOffice can also be used for snowmaking systems, grooming machines and other facilities. A great tool that we can recommend.
